PARTNER WITH CVN

Building Stronger Systems of Care for Veterans & Military Families

Cohen Veterans Network (CVN) was founded through a significant private philanthropic investment to expand access to high-quality, evidence-based mental health care for veterans, service members, and military families. Government partners can build on that investment by partnering with CVN to sustain and expand access to an established clinical model with experienced providers, existing infrastructure, consistent quality standards, and measurable outcomes.

A FLEXIBLE PUBLIC-PRIVATE PARTNERSHIP MODEL

Every community is different. CVN works with government partners to develop flexible partnerships that reflect local needs and priorities while supporting clinic operations, expanded access to care, outreach, telehealth, case management, and clinical capacity.

Whether supporting an existing Cohen Clinic or exploring opportunities to establish one, partnerships are designed to meet each state's unique goals and the needs of its military-connected community.

BUILDING ON AN ESTABLISHED INVESTMENT

Government partners gain access to an established, nationally recognized model of care. Cohen Clinics operate within a framework built around evidence-based care, standardized clinical and operational practices, accreditation, and performance measurement — providing partners with confidence that public investments support a proven, accountable system.

WHAT PUBLIC-PRIVATE PARTNERSHIPS MAKE POSSIBLE

- ★ **Sustain Local Services:** Maintain access to proven mental health care for veterans, service members, and military families.
- ★ **Leverage Private Investment:** Extend the impact of CVN's investment through shared public-private support.
- ★ **Strengthen Local Systems:** Complement existing community resources and help fill gaps in care.
- ★ **Invest with Accountability:** Support a proven clinical model with consistent quality standards, accreditation, and measurable outcomes.
- ★ **Advance Local Priorities:** Structure partnerships around each state's unique needs, priorities, and resources.

LET'S BUILD A SUSTAINABLE PARTNERSHIP

CVN welcomes the opportunity to work with government leaders interested in strengthening behavioral health services for veterans, service members, and military families.
